# FORK SEAL KIT MTB

# FORK SEAL KIT FOR MOUNTAIN BIKE

The mountain bike fork seal kit from SKF contains two integrated oil seal-dirt scrapers, crush washers and preimpregnated foam rings. Depending on the fork manufacturer, the kit may consist of two oil seals and two dirt scrapers.

- The integrated dust sealing lip is designed as a first guard against dirt entering the fork, thus preventing contamination of the other components in the fork
- The integrated oil sealing lip prevents oil from exiting the fork
- The special pre-impregnated foam ring within the kit provides enhanced friction reduction to the fork
- User friendly for quick replacement during periodical oil service
